

Bhumit Kotadiya

SQA Engineer – L1

Ahmedabad, India | +91 6355934373 | bhumit5207@gmail.com

LinkedIn: <https://linkedin.com/in/bhumit-kotadiya>

Professional Summary

Detail-oriented and results-driven SQA Engineer with nearly 2 years of experience spanning Manual Testing, Automation Testing, and Backend Database Validation across the E-Commerce and Fintech domains. Adept at building and executing scalable automation frameworks utilizing Playwright, Selenium WebDriver, Testim.io, and Robot Framework. Proven track record of executing complex SQL data validations, tracking defects via Jira, and collaborating in Agile/Scrum environments to ensure high-quality software delivery across web and mobile platforms.

Core Competencies

- **Testing Methodologies:** Manual Testing, Automation Testing, Regression Testing, Sanity Testing, User Acceptance Testing (UAT), Localization Testing
- **Test Automation Frameworks:** Playwright, Selenium WebDriver, Testim.io, Robot Framework
- **Databases & Backend Testing:** SQL (Joins, Filters, Data Mapping, Transformations)
- **Languages & Scripting:** Python, JavaScript, TypeScript
- **Defect Tracking & Management:** JIRA
- **Version Control & CI/CD:** Git, GitHub
- **Methodologies:** Agile
- **Operating Systems & Platforms:** Windows, Linux, iOS, Android

Professional Experience

QAble Testlab Private Limited – Ahmedabad, India

SQA Engineer – L1 | Jan 2024 – Present

Project : E-Commerce Brand (US) | Platform: Web Application, Mobile Application

- Executed comprehensive functional and localization testing for a global e-commerce platform to ensure seamless performance across multiple regions, including Canada (English/French), Brazil, Japan, the UK, and France.
- Formulated and maintained automated test scripts using Playwright for desktop and mobile web viewports, targeting Sanity and UAT test suites.
- Built and deployed automated regression test suites using Testim.io, achieving efficient cross-browser validation and reducing manual testing efforts across production releases.
- Audited regional content and UI layouts against Figma designs to maintain brand consistency and strict UI/UX alignment across distinct locales.
- Successfully led QA initiatives for high-impact releases, including the Japan Site Launch and the integration of a Passwordless Login feature.
- Optimized test execution logic to minimize test flakiness and significantly accelerate feedback loops within daily Agile deployment cycles.

Project : Fintech Domain (US) | Platform: Web Application

- Performed end-to-end backend and database validation by executing complex SQL queries to enforce data accuracy, consistency, and integrity between source and target systems.
- Constructed data validation scripts utilizing advanced joins, filters, count checks, and delta-comparison logic across multi-million row datasets.
- Validated newly onboarded datasets by verifying ETL data mappings, structural transformations, and business

rule compliance.

- Authored detailed data-validation test cases, identified data mismatches/missing records, and managed the defect lifecycle within Jira.
- Collaborated closely with developers and business analysts to root-cause data anomalies, ensuring swift data fixes and stable production deployments.

Technical Skills Summary

- **Tools & Technologies:** Playwright, Selenium WebDriver, Robot Framework, Testim.io, Figma, MS Excel
- **Databases:** PostgreSQL, MariaDB
- **Browsers & Environments:** Chrome, Firefox, Safari, Edge, Android, iOS

Education

- **Bachelor of Computer Applications (BCA)**
- **Parul Institute of Computer Application | Graduated: 2024**

Achievements & Highlights

- **Automation Efficiency:** Successfully introduced automated regression solutions that reduced manual testing cycles and improved overall release speed.
- **Performance Recognition:** Earned organizational recognition for consistent performance, agility, and commitment to cross-functional project success.
